

**AMENDMENT TO THE TITLE OF INVENTION**

*Please amend the Title of the Invention as follows:*

INFORMATION PROCESSING APPARATUS FOR ACCESSING MEMORY  
SPACES INCLUDING A USER MEMORY SPACE AND A SECURE MEMORY SPACE

**AMENDMENT TO THE SPECIFICATION**

*Please amend the Specification beginning on page 1, line 21 as follows:*

In PDA using an open source OS such as [[Linus]] Linux, the software development environment is widely disclosed to the users. As a result, the development of applications is facilitated. On the other hand, the encryption key, the data and the instructions stored in the secure memory space inaccessible in the user mode are may be easily stolen by being transferred to the user memory space or the external space using the privileged mode of OS.
